

Photo ID Software For Centralized Card Issuance

ASURE ID™

Server

Captures the power of the Internet to create a central card issuance service that easily supports remote offices and multiple customers.

Key Features

- Runs on MS Windows 95, 98, NT4.0, 2000 and XP
- Simple Installation
- Handles an unlimited number of simultaneous connections from Asure ID Connect, Asure ID Express & Asure ID Enterprise users
- Automatic email notification of new templates and card transactions
- Smart card based secure system access with user definable privileges and passwords
- Manages detailed billing, shipping and other important account information
- Cards arrive and are managed in a “ready to print” format
- Configurable single, batch and multi card per sheet printing on most Windows compliant printers
- Remote print management tools with support for printer pooling
- Easy to use template editing utility
- Encodes barcodes (including PDF417 and Datastrip), magstripes and smart cards (both contact & contactless)
- Custom report writer with dossier printing
- Export to any ODBC compliant database with easy to use wizards
- Full support for network configuration over a corporate (LAN/WAN) network with native support for MS SQL Server™ 7.0 and 2000 for improved security, larger database capabilities and better network management
- Supports server clustering for enhanced ID card issuance
- Built in system security allows easy setup and configuration of Asure ID Server
- Available in multiple languages

Asure ID Server™ is part of the Asure ID Family Of Products™ which offers a complete line of Internet enabled photo ID software products that are simple to learn, more powerful, loaded with useful features and flexible enough to improve the issuance of photo ID cards for virtually any size and any kind of enterprise.

Photo ID Software For Centralized Card Issuance

ASURE ID™ Server

Streamlines & Secures Central Card Issuance

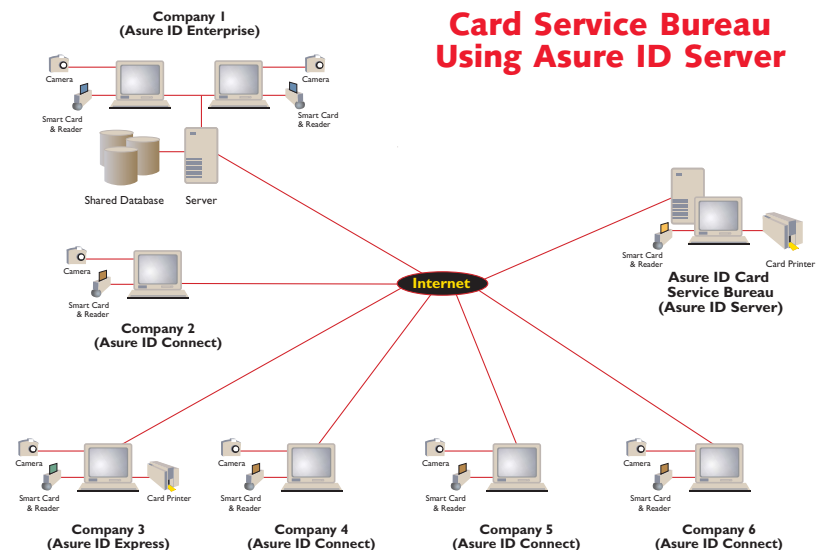

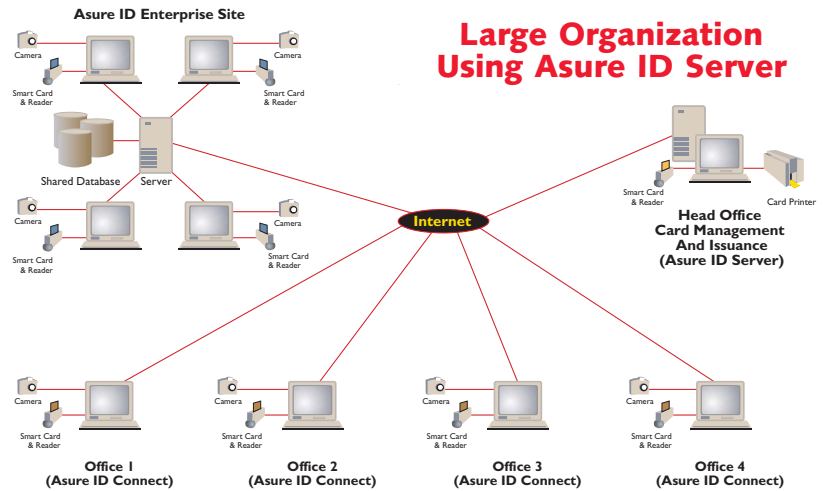

Asure ID Server's innovative technology saves valuable time by ensuring that all card records that are securely transmitted from users (Asure ID Connect™, Asure ID Express™ and Asure ID Enterprise™) arrive in a "ready to print" format.

Decreased Costs & Tighter Controls For Large Organizations

Asure ID Server™ eliminates the need for dedicated network connections and card printers in remote locations, while at the same time allowing for a secure, easily managed and tightly controlled card issuance service.

Increased Service & Revenue Potential For Card Service Bureaus

Asure ID Server™ is great for Card Service Bureaus in two ways. First, clients using Asure ID Connect, Asure ID Express™ or Asure ID Enterprise™ can be offered vital back up card printing services when they have increased card production requirements or their local printers are unavailable. Additionally, when clients are unable to justify the costs of an internal photo card production system, Service Bureaus can become the primary source for card issuance.

What's In The Box

- Asure ID Server CD
- Smart Card
- Smart Card Reader
- Install Notes
- QuickStart Guide

Minimum System Requirements

- 233Mhz MMX Intel or AMD CPU
- 64MB RAM (128MB recommended)
