First Industry 4.0 Ready Generation

**THE WORLD'S FASTEST
ALLROUNDER CARD COUNTING MACHINE**
FOR REGULAR AND THE MAJORITY OF DEMANDING CARD TYPES

SPECIFICATION

- Card Format: ID1 (53,98 x 85,6mm)
landscape orientation
- Card Types: blank, coloured cores, most
types of clear, translucent,
embossed etc.
- Card Thickness: ~ 0.40 mm - 5 mm
(~ 16 mil. – 200 mil.)
- Max. Card Box Length: 465 mm (18.3 inches)
- Display: 22 " touch-screen
- Control Unit / OS: fanless, industrial PC,
WIN 7 PRO 64 bit
- Camera Type: high resolution USB 3.0
line scan camera
- Process: contactless, most advanced
digital image analysis software
- Light Source: LED bars
- Interfaces/Ports: 4 x USB 3.0 / 1x Ethernet
- Dimensions W x D x H: 690 mm x 540mm x 520mm
(width x depth x height)
- Weight: 48 kg
- Operating Voltage: AC 100V - 230V, 50Hz – 60Hz
- Power Consumption: 130 W

Technical changes reserved.

NEW FEATURES

- Optional software upgrade packages to meet future requirements of **industry 4.0** (details of available options explained on a separate spec sheet)
- Consistent User Interface achieved by scalability to different screen sizes
- Individually adjustable sizes of control buttons and wording on the GUI (in certain limits)
- Individually adaptable denomination of control elements on GUI (in certain limits)
- Superior new digital image analysis software
- New onboard state-of-the-art counting program developer tool to conveniently create new programs or to modify existing programs and save these onto the machine
- Simple and very convenient machine operation by a protected 22 " high resolution touch-screen
- Compensation of different card box bottom heights
- Usage of superfast USB 3.0 camera technology

FURTHER BENEFITS

- Accurate counts of a wide card type range; from regular card types to special card types
- Counting of most card types through shrink-wrap (shrink-wrap must be tight + level of wrinkles minimised)
- Fastest counting speed of **1 sec.** per 500 cards box
- Contactless counting process by state-of-the-art software analysis of high resolution image
- Counts cards inside boxes which eliminates time consuming card loading / unloading processes
- Convenient and fast card box loading and unloading
- Rugged machine design guarantees a reliable, long-term performance in rough production environment
- Very low power consumption
